MAURA PETERSON
CLERK OF COURT

June 25, 2026

The Honorable Carl J. Nichols
United States Foreign Intelligence Surveillance Court
U.S. Courthouse
333 Constitution Avenue, N.W.
Washington, D.C. 20001

Re: (U) *In Re Accuracy Concerns Regarding FBI Matters Submitted to the FISC*,
Docket No. Misc. 19-02.

Dear Judge Nichols:

(U) The government files this letter in furtherance of its obligations pursuant to this Court's Order dated May 22, 2023 (Order), in the above-listed docket number, which ordered the government to file periodic reports regarding technological improvements to processes used by the Federal Bureau of Investigation (FBI) for preparing Foreign Intelligence Surveillance Act (FISA) applications or verifying the information contained in FISA applications. In the Order, the Court ordered the government to provide a report no later than October 13, 2023. The Order further required that, if deployment of the Bridge (discussed below) was not completed by October 13, 2023, the government shall submit subsequent reports at intervals of no more than 90 days thereafter, until the government reports that such deployment has been completed. The government timely filed its report on October 13, 2023, noting, in part, that the deployment of the Bridge was ongoing. As described in subsequent update reports, while deployment of the Bridge is fully completed on the FBI's Secret enclave, the FBI is still working to deploy the Bridge on the Top Secret (TS) enclave. This letter constitutes the government's updated report in this matter.

(U) As previously reported, the FBI has developed and implemented an electronic FISA management system named the Bridge to streamline the FBI's FISA-related workflow processes. The Bridge replaces the FBI's prior system, the FISA Management System (FISAMS), and remedies certain deficiencies presenting technological challenges due to the age of FISAMS. Among other benefits, the Bridge uses a technical interface to communicate with Sentinel, the FBI's case management system, and automatically cross-references Bridge data with Sentinel case data. Users

UNCLASSIFIED

can also complete FISA request forms and FISA verification forms directly in the Bridge, which assists users in validating inputted data.

(U) As noted in the government's prior reports, on the Secret enclave, the FBI's Bridge team has primarily transitioned to a support and operations role. FISAMS is no longer used for processing new or renewal Secret-level FISA applications. The FBI, through the Bridge team, continues to provide training and direct support to address user issues, and continues to refine and improve the application's functionality to make it more user friendly.

(U) The FBI reports that, with respect to TS-Bridge, it is in the concept exploration and assessment phase where potential cloud hosting solutions are being reviewed for fiscal, technical, and operational equities and efficiencies. The FBI also continues to undertake preliminary activities, including approving the necessary network extension to facilitate the installation of a network connection, establishing the appropriate network environment, and verifying all required network connections.

(U) As the Bridge has not yet been deployed on the TS enclave, the government will provide a subsequent report to the Court again within 90 days of the date of this filing, which will continue to address the status of the planned deployment of the TS-Bridge, and, if applicable, provide updates on any material developments regarding the FBI's technological efforts to improve compliance with the FBI's accuracy and completeness procedures.

(U) The FBI has reviewed this letter and confirmed its accuracy.

Respectfully submitted,

Gabriel R. Sanz-Rexach
Chief, Operations Section
Office of Intelligence
